

COMMUNITY PLANTING DAY

WARD RIVER WATERHOLE RESERVE

South West NRM
*Achieving sustainable landscapes
for rural communities*

Help plant 750 wetland plants along the river bank in just one morning. The revegetation of the bank will help reduce erosion, improve water quality and sustain the biodiversity of this valuable natural asset.

The day will include

- a talk on the environmental values of the waterhole
- the launch of the Plan of Management
- a sausage sizzle provided by the Charleville Fishing and Restocking Club

No RSVP required – just turn up with water, sun protection, gardening gloves, old enclosed shoes (as you may get muddy) and lots of enthusiasm for enhancing the waterhole.

WHEN Sunday 29 April 2018 from 10am

WHERE Ward River Waterhole Reserve
20km from Charleville on the Diamantina Developmental Road (Quilpie) - look for the SWNRM signs

FOR MORE INFORMATION, PLEASE CONTACT SOUTH WEST NRM 07 4656 8500

This project is supported by South West NRM through funding from the Queensland Government's Queensland Regional Natural Resource Management Investment Program
